

Press Release

Greek Data Center Association (GRDCA) strengthens its ecosystem with 12 new members

A total of 47 companies form the Association's ecosystem

Athens, 25 February 2026: [Greek Data Center Association \(GRDCA\)](#) - the organization representing data center operators, service providers, and key stakeholders of the sector - announces the inclusion of 12 new member companies, further consolidating its role as a key institutional stakeholder and bringing its membership base to 47 companies.

This development contributes to the further expansion of the Association's network and the collective representation of the data center sector in Greece. At the same time, it reflects the dynamic growth of the domestic digital infrastructure market and the increasingly pivotal role of data centers in the digital economy.

The 12 new companies joining GRDCA are: LPI, MANAGEMENT FORCE Group, MPD GREECE S.A., NIGICO S.A., PETCOR S.A., Rittal Greece, SALFO AND ASSOCIATES S.A., Spyrides Group, Synapsecom, TEAM E-M Consulting Engineers S.A., DOMIKI TECHNOGNOSIA Ltd, OTE ESTATE.

The members joining GRDCA represent key disciplines related to the design, development, construction, operation, and technical support of data centers, strengthening the Association's footprint and reinforcing its role as the representative body of the data center sector in Greece.

GRDCA aims to advance the development and institutional representation of the data center industry, while positioning Greece as a regional hub for investment and technological expertise. Its key priorities include sustainability and energy efficiency, social responsibility, research, and strengthening the link between the sector, education, and human capital.

Alexandros Bechrakis, Chairman of GRDCA and CEO of Digital Realty in Greece, stated: *"The growth of GRDCA's membership with 12 new members highlights the accelerating momentum of Greece's data center ecosystem and the increasing need for a strong, unified representative body. Today, more than ever, the presence of a dynamic institutional body representing the sector is critical, as the development and sustainability of data centers are a cornerstone of Greece's digital economy and digital sovereignty. GRDCA continues to grow alongside companies that bring expertise, experience, and a strategic role in the development of modern digital infrastructure, actively contributing to the shaping of a sustainable and competitive framework for the future."*

About GRDCA

The GRDCA is a non-profit organization representing the collective economic, legal, commercial, and technical interests of companies that operate, develop, or own data centers in Greece. Its mission is to accelerate the growth of the Greek data center industry, enhance energy efficiency, and establish the country as a critical regional digital hub.

The GRDCA also works to foster a competitive environment for new data center investments, promote more streamlined and flexible processes for infrastructure development and operation, and strengthen the overall sustainability and performance of the sector. In parallel, it advances corporate social responsibility principles, ensures high standards of workplace safety, and supports skills development—contributing to the long-term resilience and growth of Greece’s digital ecosystem.
